

Long Pile Pad for Wood Application

Specially for wood flooring

The most productive system for applying penetrating treatments on woods.

Increase your productivity and get a better finish when you apply treatments to teak wood flooring or other horizontal surfaces.

Products table

ref.	measurement
13290	225 x 85 mm

Prevents excess thickness

Thanks to its composition, you will be able to dose the amount applied.

Prevents foaming

The composition of the fibres means you won't have to deal with the foaming caused by other application systems.

Greater penetration

The material with long fibres and the sponge base, enables you to apply treatments in the most difficult-to-reach parts.

Can be adapted to extension poles

It includes a tapered thread adapter for the Italian-Spanish thread.
